Portfolio: <https://johnsmith.dev>

PROFILE

Highly motivated Software Engineer with a strong foundation in Machine Learning, Data Science and Full Stack Development. Passionate about solving real-world problems using Artificial Intelligence and Cloud Technologies.

SKILLS

Python
Java
C++
SQL
JavaScript
React
Node.js
HTML
CSS
Git
Docker
Kubernetes
AWS
Azure
TensorFlow
PyTorch
Scikit-learn
Pandas
NumPy
Machine Learning
Deep Learning
Natural Language Processing
Computer Vision
Power BI
Excel

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

Indian Institute of Technology Delhi

2020 - 2024

CGPA: 8.91

EXPERIENCE

Software Engineer Intern

Google

January 2024 - June 2024

- Developed REST APIs using Python and Flask.
- Built automation scripts reducing manual work by 35%.
- Worked with SQL databases.
- Used Docker containers for deployment.

PROJECTS

Resume Parser

Developed an intelligent Resume Parser using Python, spaCy, Regex, NLP and Machine Learning capable of extracting skills, education, experience and contact details.

Technologies:

Python, spaCy, SQL, Gradio

Employee Attrition Prediction

Built a Machine Learning model using Random Forest to predict employee attrition.

Technologies:

Python

Scikit-learn

Pandas

NumPy

CERTIFICATIONS

AWS Certified Cloud Practitioner

Microsoft Azure Fundamentals

Google Data Analytics Professional Certificate

ACHIEVEMENTS

Winner of College Hackathon 2023

Solved more than 500 coding problems on LeetCode

LANGUAGES

English

Hindi

INTERESTS

Artificial Intelligence
